

Ahmad Najmi Ariffin

Data Scientist & Statistician — Market Intelligence · Insight · Analytics

Putrajaya, Malaysia · anajmiariffin@gmail.com · 013-474 8674 · [linkedin.com/in/najmiariffin](https://www.linkedin.com/in/najmiariffin) · github.com/booluckgmie · anajmiariffin.netlify.app

Profile. Data scientist and statistician with 13+ years across Malaysia’s public and private sectors: national statistics, energy-sector procurement intelligence and independent consultancy. MSc Applied Statistics (University of Malaya), BSc Medical Science, PhD in Health Economics & GIS in progress. I turn unstructured, multi-source data — news, public records, open data — into sentiment signals, structured briefings and executive dashboards, working where technical build meets strategic communication for government and industry stakeholders. Fluent in Bahasa Malaysia and English. Currently Executive, Industry Advisory (OGSE Competitiveness) at PETRONAS, Group Procurement.

FIT FOR THE HEAD, CONTENT ANALYTICS DEPARTMENT ROLE

Online media intelligence & digital content analysis	Lead OGSE industry intelligence: market diagnostics, vendor analysis and strategic insight generation. An LLM-based narrative tool converts unstructured data into structured, decision-ready analysis. Daily market-intelligence briefing: curated news auto-categorised by sector, with sentiment and signal scoring (live). Daily AI sentiment analysis feeding a public mobility index (live).
Social-listening / media-listening platforms	Hands-on with custom-coded crawlers and scrapers plus social-media and free-tier APIs, feeding sentiment and categorisation pipelines (above). I build the collection and analysis layer myself; I have not used paid commercial listening platforms and am ready to work on one.
Large volumes of data; emerging issues and trends	Co-led the architecture of OpenDOSM , a high-traffic national open-data platform; ETL pipelines and ML modules for PADU centralising socio-economic data across ministries; workforce-planning and manpower-forecasting dashboards; disruption tracker correlating outages with disasters, conflict and shutdowns.
Actionable insights; critical thinking	Cross-departmental vendor risk assessment model; real-time compliance-monitoring alerts; conflict-of-interest detection using relationship-matrix analysis; policy-impact methods (difference-in-differences, regression discontinuity, synthetic control).
Report writing & presentation (BM / English)	Automated recurring statistical and narrative reporting; invited talk “Klinik OpenDOSM & Kawasanku” (Royal Malaysia Police GIS Department, Mar 2023); bilingual data-discovery tool (Tanya Data). Fluent in Bahasa Malaysia and English.
Executive-level reports and briefings	Decision-ready analysis for procurement leadership; executive dashboards across Metabase, Tableau and Power BI; KPI dashboards on research output presented to faculty leadership.
Leadership & stakeholder management	Partnered with MPRC, DOSM and cross-divisional teams to shape the OGSE Blueprint 2021–2030 and coordinate the Banci OGSE 2024 national data collection; co-led OpenDOSM architecture; coordinated 50+ national workshops and conferences; founder and owner of MyKetapang Group since 2015. Role in general: set priorities, coordinate contributors across government, industry and NGO stakeholders, and present results to senior leadership.

PROFESSIONAL EXPERIENCE

Executive, Industry Advisory (OGSE Competitiveness) — Group Procurement · PETRONAS	Jul 2024 – Present
- Lead OGSE industry intelligence covering market diagnostics, vendor analysis and strategic insight generation for procurement decision-making. - Built an LLM-based insight-generation tool and a cross-departmental vendor risk assessment model, converting unstructured data into structured, decision-ready analysis. - Designed ETL pipelines and BI dashboards for manpower forecasting and workforce planning across the OGSE sector. - Implemented real-time compliance-monitoring alerts and a conflict-of-interest detection engine for proactive audit support; maintain a vendor intelligence database of 4,000+ profiles; contributed to a data exploration platform. - Partnered with MPRC, DOSM and cross-divisional teams on the OGSE Blueprint 2021–2030 and the Banci OGSE 2024 national data collection.	
Statistician / Data Scientist — Core Team Big Data Analytics · Department of Statistics Malaysia (DOSM)	Mar 2019 – Jun 2024
- Co-led the architecture of OpenDOSM, Malaysia’s open-data platform, growing it into a high-traffic public access point; built ETL pipelines and ML modules for PADU across ministries. - Delivered real-time COVID-19 dashboards and spatial tools (GoTrace Apps) for field-level public-health response; built SIIM, a micro-industry database for informal-sector policy. - Standardised BI delivery across Metabase, Tableau and Power BI for stakeholder self-service; automated recurring statistical reporting with R, Python and Excel VBA.	

Project Officer / Research Assistant · University of Malaya, Faculty of Dentistry

Aug 2011 – Feb 2019

- Led performance analytics and KPI dashboards on faculty research output, grants and publications; coordinated 50+ national research workshops, conferences and training events; contributed to a peer-reviewed study in *Quintessence International* (ISI-indexed).

Founder & Owner · MyKetapang Group

Aug 2015 – Present

- Data-as-a-service consultancy for Malaysian SMEs, NGOs and professionals: dashboards, GIS analytics, predictive dashboards and data storytelling; launched 50+ websites and several web applications.
